

IN THE SPECIFICATION

Please substitute the replacement paragraph as shown below in place of the second paragraph of page 4 of the specification as filed.

Replacement Paragraph Of Page 4 Of Specification

The following figures show a few examples of signals obtained with the invention through a wetting liquid, the upper trace illustrating the emitted signal and the lower trace the received signal. On Fig. 2A, the target 2 was removed; in the case of Fig. 2B, the target was set up in the wet state; in the case of ~~Fig. 3~~ Figure 2C, it was set up but not wetted; finally Fig. 2D illustrates an intermediate (partial) wetting of the target 3. Total or partial absence of wetting was reproduced by simulation, by covering the target 2 with an adhesive sheet under which gas was occluded.
